Your Private Note Taker!

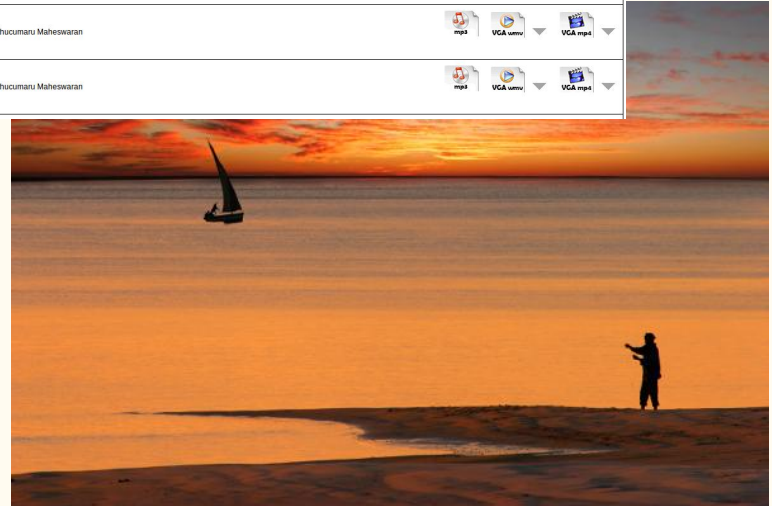

Why Smartnote?

Imagine you are watching an amazing video. There is so much interesting information in it. You wanna write them down.

Or you are watching lecture recordings and become so lazy
•)

McGill COURSES

Stop the video and take a note?

Stop the video and take a note?

NO :(

Just tell SmartNote everything you want to note down.

SmartNote collects all your talks and generates an organized notebook.

Don't want to read your notes?
SmartNotes reads it for you!

This is where our idea from.

How to use?

STEP 1

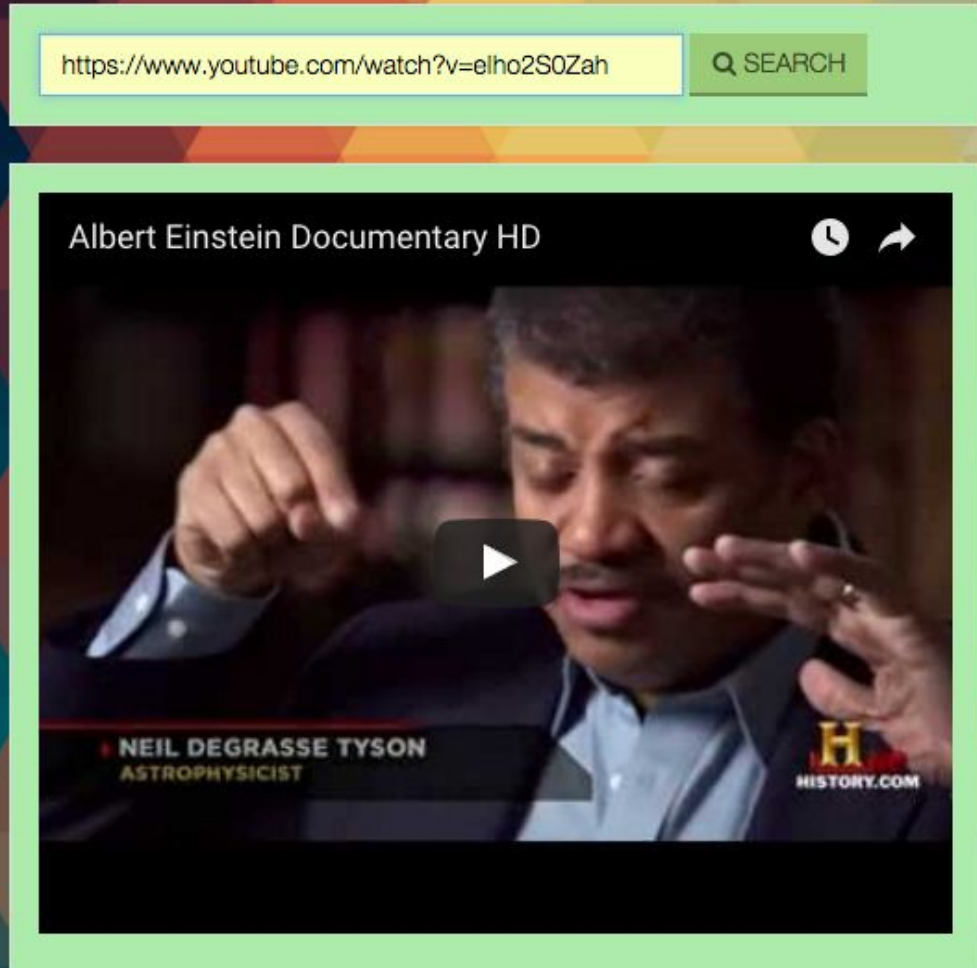

The image displays the SmartNote application interface. At the top left is the SmartNote logo, which consists of a stylized black 'e' with sound waves and the text 'SmartNote' below it. Below the logo is a search bar containing the URL 'https://www.youtube.com/watch?v=elno2S0Za' and a 'SEARCH' button. A red arrow points from this search bar to a light green box on the left labeled 'STEP 1'. Below the search bar is a video player showing a clip of Neil deGrasse Tyson with the title 'Albert Einstein Documentary HD'. To the right of the video player is a 'Smart Note' section with a large text area for notes and buttons for 'SPEAK', 'CLEAR', 'SAVE', 'BROWSE...', and 'LOAD'. At the bottom right is a 'Speech Recognition' section with a text area and a 'RECORD' button. The background of the interface features a colorful geometric pattern of triangles.

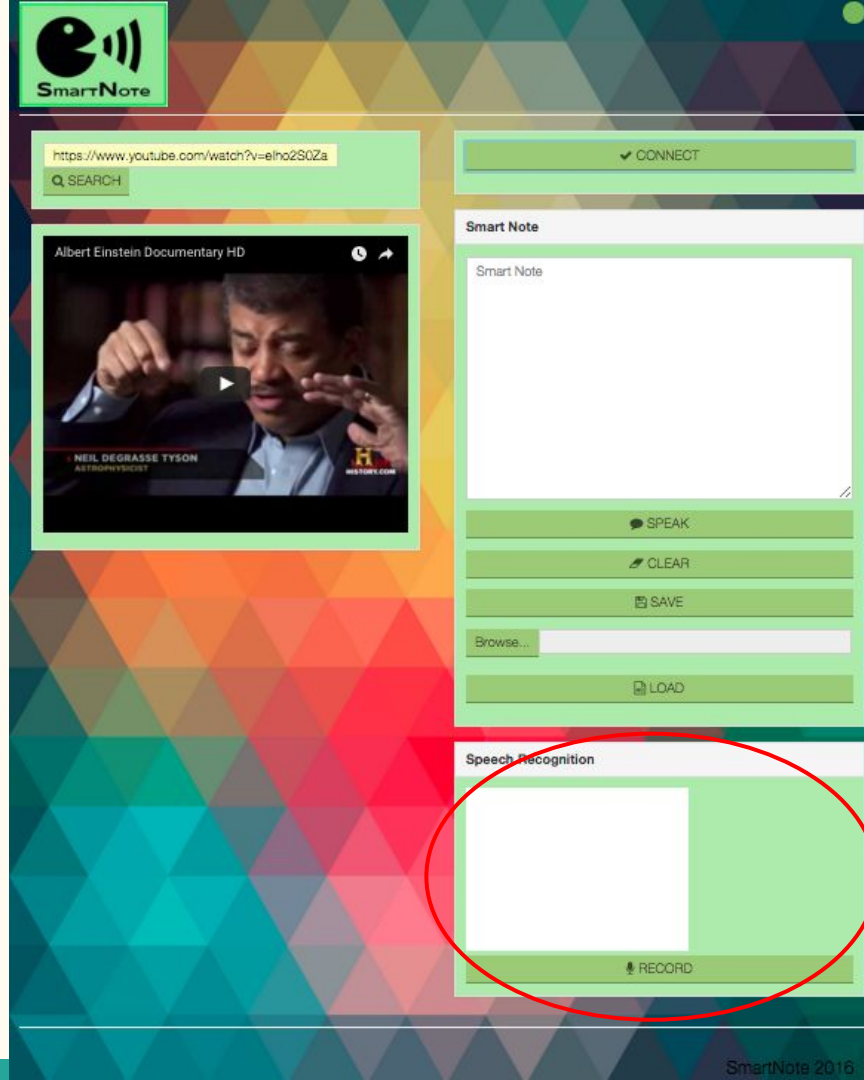

Tell SmartNote the video you wanna open.

This is the top search interface, featuring a light green background with a dark teal geometric pattern on the left. It contains a white search input field with the placeholder text "Enter video url..." and a green button with a magnifying glass icon and the word "SEARCH".This is the bottom search interface, identical in design to the top one. The search input field now contains the URL "https://www.youtube.com/watch?v=elho2S0Zah", which is highlighted with a yellow background. The "SEARCH" button remains green with a magnifying glass icon.

Then your video will
show up in the player.
Play/Pause it just like
what you do on
Youtube.

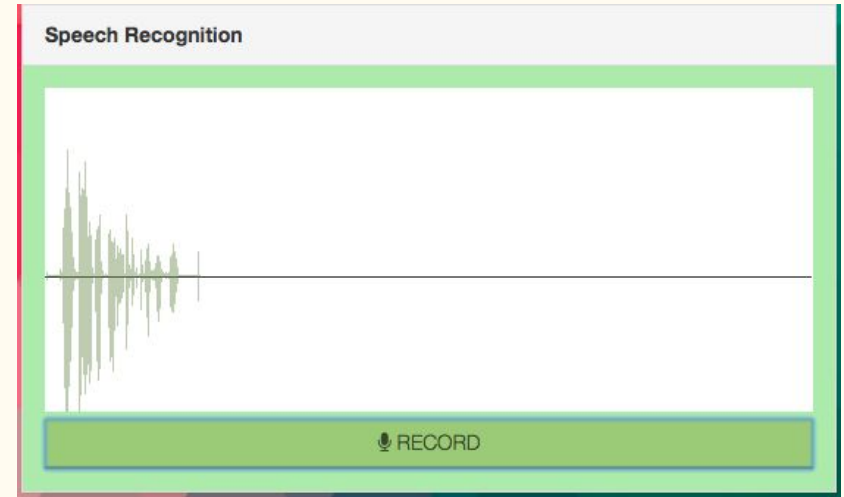

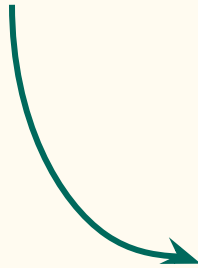

When you
want to take a
note, turn to
the right panel

STEP 2

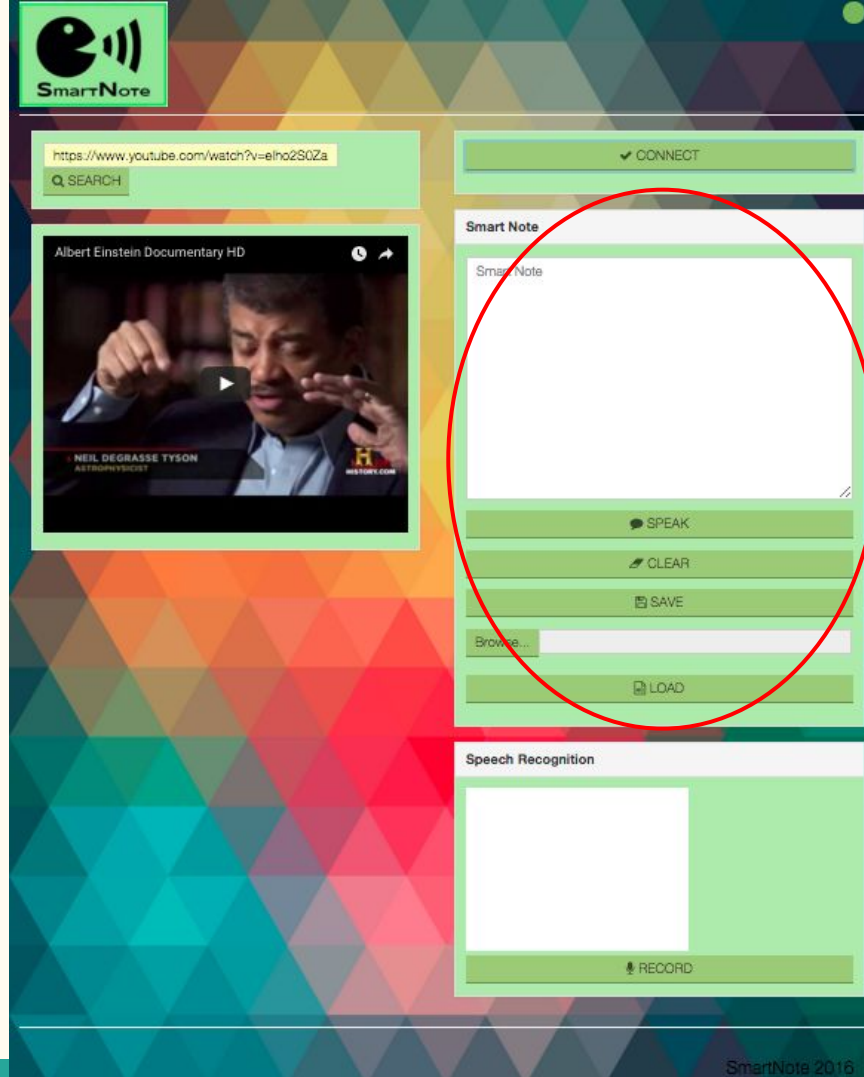

Click “**Record**” button.

Tell SmartNote what’s on your mind. Your voice will be recorded and converted to text.
